

## UNITED STATES DISTRICT COURT

FILED

for the  
Eastern District of Missouri

NOV - 7 2019

U. S. DISTRICT COURT  
EASTERN DISTRICT OF MO  
ST. LOUISIn the Matter of the Search of  
(Briefly describe the property to be searched  
or identify the person by name and address)

Case No. 4:19 MJ 6376 PLC

Precision Location Information; Subscriber &  
Transactional Records; Cell Site Information; Pen  
Register & Trap-and-Trace for Phone # (314) 625-3288

## APPLICATION FOR A SEARCH WARRANT

I, a federal law enforcement officer or an attorney for the government, request a search warrant and state under penalty of perjury that I have reason to believe that on the following person or property (identify the person or describe the property to be searched and give its location):

See Attachment A.

located in the \_\_\_\_\_ District of \_\_\_\_\_ Kansas \_\_\_\_\_, there is now concealed (identify the person or describe the property to be seized):

See Attachment B.

The basis for the search under Fed. R. Crim. P. 41(c) is (check one or more):

- ☒ evidence of a crime;
- ☒ contraband, fruits of crime, or other items illegally possessed;
- ☒ property designed for use, intended for use, or used in committing a crime;
- ☐ a person to be arrested or a person who is unlawfully restrained.

The search is related to a violation of:

Code Section

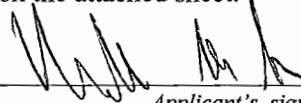

Offense Description

Title 21, USC Section 841, 846

Conspiracy to possess with intent to distribute controlled substances.

The application is based on these facts:

- ☒ Continued on the attached sheet.
- ☐ Delayed notice of \_\_\_\_\_ days (give exact ending date if more than 30 days: \_\_\_\_\_) is requested under 18 U.S.C. § 3103a, the basis of which is set forth on the attached sheet.

Applicant's signature

Printed name and title

**AFFIDAVIT**

I, Matthew A. Sutton, being first duly sworn, hereby depose and state as follows:

**INTRODUCTION AND AGENT BACKGROUND**

1. I make this affidavit in support of an application for a warrant and order pursuant to Rule 41 and 18 U.S.C. §§ 2703(a), 2703(b)(1)(A) and 2703(c)(1)(A) for information associated with a cellular telephone **(314) 625-3288** (hereinafter referred to as the “**subject cellular telephone**”) to require the **Sprint Corporation** (hereinafter “**the Provider**”), and/or any service providers reflected in Attachment A, to include providers of any type of wire and/or electronic communications, and any other applicable service providers, to disclose to the United States location information, including precision location information, transactional and subscriber data and cell site location information, and the installation and use of other pen register and trap and trace devices associated with the subject cellular telephone, as described in Attachment B to the proposed warrant and order.

2. I have been employed as a Special Agent since May 2008, during which time I have gained experience and undergone training in the investigation of narcotics trafficking organizations. Prior to the FBI, I served in the United States Army for approximately 9 and a half years. During the course of my law enforcement experience I have participated in several complex domestic investigations involving drug trafficking organizations dealing in cocaine, methamphetamine, heroin, and other controlled substances. I have also received training and participated in investigations involving the interception of both wire communications and electronic communications.

3. The facts in this affidavit come from my personal observations, my training and experience, and information obtained from other agents and witnesses. This affidavit is intended to show merely that there is sufficient probable cause for the requested warrant and does not set forth all of my knowledge about this matter.

4. The present affidavit is being submitted in connection with an application of the United States for a warrant and order authorizing agents/officers of the investigative agency(ies), and other authorized federal/state/local law enforcement agencies, to obtain location information, including precision location information, cell site location information, and other signaling information, including pen register information, in an effort to locate and monitor the location of the subject cellular telephone.

5. Based on my training and experience and the facts as set forth in this affidavit, there is probable cause to believe that the **subject cellular telephone** is currently being used in connection with violations of Title 21, United States Code, Section(s) 841(a)(1) and 846 (hereinafter referred to as “**the subject offenses**”), by **MAURICE FULLER** (hereinafter referred to as “**FULLER**”),

6. There is also probable cause to believe that the location information described in Attachment B to the proposed warrant and order will lead to evidence of the aforementioned subject offenses as well as to the identification of individuals who are engaged in the commission of those criminal offense and related crimes.

#### **BACKGROUND CONCERNING WIRELESS PROVIDERS**

7. Based on my knowledge, training, and experience, as well as information provided by investigators with specialized experience relating to cellular telephone technology, I am aware of the following facts and considerations:

a. Wireless phone providers typically generate and retain certain transactional information about the use of each telephone call, voicemail, and text message on their system. Such information can include log files and messaging logs showing all activity on a particular account, such as local and long distance telephone connection records, records of session times and durations, lists of all incoming and outgoing telephone numbers or other addressing information associated with particular telephone calls, voicemail messages, and text or multimedia messages.

b. Wireless phone providers also typically generate and retain information about the location in which a particular communication was transmitted or received. For example, when a cellular device is used to make or receive a call, text message or other communication, the wireless phone provider will typically generate and maintain a record of which cell tower(s) was/were used to process that contact. Wireless providers maintain information, including the corresponding cell towers (i.e., tower covering specific geographic areas), sectors (i.e., faces of the towers), and other signaling data as part of their regularly conducted business activities. Typically, wireless providers maintain records of the cell tower information associated with the beginning and end of a call.

c. Because cellular devices generally attempt to communicate with the closest cell tower available, cell site location information from a wireless phone provider allows investigators to identify an approximate geographic location from which a communication with a particular cellular device originated or was received.

d. Wireless providers may also retain text messaging logs that include specific information about text and multimedia messages sent or received from the account, such as the dates and times of the messages. A provider may also retain information about which cellular handset or device was associated with the account when the messages were sent or received. The

provider could have this information because each cellular device has one or more unique identifiers embedded inside it. Depending upon the cellular network and the device, the embedded unique identifiers for a cellular device could take several different forms, including an Electronic Serial Number (ESN), a Mobile Electronic Identity Number (MEIN), a Mobile Identification Number (MIN), a Subscriber Identity Module (SIM), an International Mobile Subscriber Identifier (IMSI), or an International Mobile Station Equipment Identity (IMEI). When a cellular device connects to a cellular antenna or tower, it reveals its embedded unique identifiers to the cellular antenna or tower in order to obtain service, and the cellular antenna or tower records those identifiers.

e. Wireless providers also maintain business records and subscriber information for particular accounts. This information could include the subscriber's full name and address, the address to which any equipment was shipped, the date on which the account was opened, the length of service, the types of service utilized, the ESN or other unique identifier for the cellular device associated with the account, the subscriber's Social Security Number and date of birth, all telephone numbers and other identifiers associated with the account, and a description of the services available to the account subscriber. In addition, wireless providers typically generate and retain billing records for each account, which may show all billable calls (including outgoing digits dialed). The providers may also have payment information for the account, including the dates and times of payments and the means and source of payment (including any credit card or bank account number).

f. Providers of cellular telephone service also typically have technical capabilities that allow them to collect and generate more precise location information than that provided by cell site location records. This information is sometimes referred to as E-911 phase II data, GPS data

or latitude-longitude data. In the Eastern District of Missouri, such information is often referred to as precision location information or PLI data. E-911 Phase II data provides relatively precise location information about the cellular telephone itself, either via GPS tracking technology built into the phone or by attempting to triangulate the device's signal using data from several of the provider's cell towers. Depending on the capabilities of the particular phone and provider, E-911 data can sometimes provide precise information related to the location of a cellular device.

g. In order to locate the subject cellular telephone and monitor the movements of the phone, the investigative agency(ies), and other authorized federal/state/local law enforcement agencies, may need to employ one or more techniques described in this affidavit and in the application of the United States. The investigative agency(ies), and other authorized federal/state/local law enforcement agencies, may seek a warrant to compel the Provider, any telecommunication service providers reflected in Attachment A, to include providers of any type of wire and/or electronic communications (herein incorporated by reference), and any other applicable service providers, to provide precision location information, including Global Position System information (if available), transactional records, including cell site location information, and pen register and trap and trace data.

#### **INVESTIGATION AND PROBABLE CAUSE**

8. The FBI and the St. Louis County Police Department (hereinafter referred to as "SLCPD"), are conducting a criminal investigation into **FULLER** regarding the commission of the subject offenses.

9. On July 31, 2019, at the direction of investigators, a FBI confidential source (hereinafter referred to as "CS1") conducted a controlled purchase of methamphetamine from

**FULLER**<sup>1</sup>. CS1 met with investigators at a neutral staging area. CS1 made two calls to **FULLER** at **subject cellular telephone** in the presence of investigators to arrange the purchase. **FULLER** directed CS1 to a meeting location. Investigators confirmed from CS1's phone that he/she called **subject cellular telephone**. These contacts were also confirmed from toll records obtained from the provider via administrative subpoena. Prior to the operation, a law enforcement officer searched CS1 and his/her vehicle for contraband with negative results. Investigators provided CS1 with prerecorded U.S. currency to conduct the purchase of methamphetamine and equipped him/her with recording and transmitting devices that were active for the duration of the operation. Investigators followed CS1 to the predetermined meeting location with **FULLER**. Based on information from CS1 and toll records for subject cellular telephone, **FULLER** via **subject cellular telephone** directed CS1 to a nearby location. At this location, CS1 entered a vehicle, a black Chevrolet Suburban, operated by **FULLER**. CS1 exchanged the prerecorded currency for the suspected methamphetamine.

10. CS1 returned to his/her vehicle and departed. Investigators followed CS1 to a neutral staging area. At the staging area, investigators deactivated and recovered the recording and transmitting devices and seized the drug evidence. A law enforcement officer again searched CS1 and his/her vehicle for contraband with negative results. During a post operational debrief, CS1 confirmed the **FULLER** had provided the methamphetamine. The suspected

---

<sup>1</sup> CS1 has provided information jointly to the FBI and SLCPD for approximately five months and provided information to the SLCPD prior to that for approximately seven months. CS1's information has proven to be credible and reliable. CS1's information has been corroborated through records checks, consensually recorded conversations, surveillance, and through the controlled purchase of illicit narcotics by CS1. According to a database available to law enforcement, CS1's criminal history includes felony convictions for Unlawful Use of a Weapon; Resist/Interfere with Felony Arrest; Distribution/Delivery/Manufacture of a Controlled Substance; and Possession of a Controlled Substance(3). CS1 is currently cooperating with law enforcement in exchange for monetary compensation.

methamphetamine weighed approximately 28.5 grams, field tested positive for the presence of methamphetamine, and was entered into FBI evidence.

11. On October 15, 2019, at the direction of investigators, CS1 conducted another controlled purchase from **FULLER**. CS1 met with investigators at a neutral staging area. A law enforcement officer searched CS1 and his/her vehicle for contraband with negative results. In the presence of investigators, CS1 made a recorded telephone call to **FULLER** at **subject cellular telephone**. During this call, **FULLER** discussed how he had to make a "detour." **FULLER** then talked about when he was going to arrive. Investigators confirmed on CS1's phone that CS1 had called **FULLER** at **subject cellular telephone**. Investigators provided CS1 with prerecorded U.S. currency to conduct the purchase of methamphetamine and equipped him/her with recording and transmitting devices that were active for the duration of the operation. Investigators followed CS1 to the predetermined meeting location with **FULLER**. At this location, CS1 again called **FULLER** at **subject cellular telephone**. **FULLER** arrived in a black Chevrolet Suburban that was driven by an unknown white female. **FULLER** got into CS1's vehicle and CS1 exchanged the prerecorded U.S. currency for methamphetamine.

12. **FULLER** exited the vehicle and CS1 departed. Investigators followed CS1 to a neutral staging area. At the staging area, investigators deactivated and recovered the recording and transmitting devices and seized the drug evidence. A law enforcement officer again searched CS1 and his/her vehicle for contraband with negative results. During a post operational debrief, CS1 confirmed the **FULLER** had provided the methamphetamine. The suspected methamphetamine weighed approximately 28.2 grams, field tested positive for the presence of methamphetamine, and was entered into FBI evidence.

13. According to subscriber records obtained from the provider via administrative subpoena, subject cellular telephone was subscribed to by MAURICE FULLER at 9917 S. Broadway, St. Louis, Missouri 63125.

14. The investigation has clearly demonstrated that the subject cellular telephone is being used in connection with the commission of offenses involving the ongoing commission of the subject offenses. Your affiant believes that the requested authorization would be a valuable asset in achieving the overall goals of the investigation

### CONCLUSION

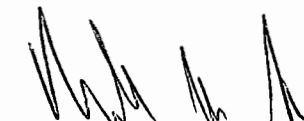

15. Based on the above information, your affiant submits that there is probable cause to believe that the **subject cellular telephone** is currently being used in connection with the commission of the subject offenses, by MAURICE FULLER, and others known and unknown. There is also probable cause to believe that the location information described in Attachment B to the proposed warrant and order will lead to evidence of the aforementioned subject offenses as well as to the identification of individuals who are engaged in the commission of those criminal offense and related crimes.

16. None of the investigative techniques that may be employed as a result of the present application and affidavit require a physical intrusion into a private space or a physical trespass. Electronic surveillance techniques such as pen register and cell site location monitoring typically have not been limited to daytime use only. Furthermore, the criminal conduct being investigated is not limited to the daytime. Therefore, the fact that the present application requests a warrant based on probable cause should not limit the use of the requested investigative techniques to daytime use only. Accordingly, the investigative agency(ies), and other authorized

federal/state/local law enforcement agencies, request the ability to employ these investigative techniques at any time, day or night.

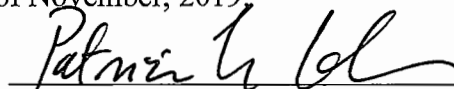

17. The monitoring of the location of the subject cellular telephone by one of the methods described herein will begin within ten (10) days of the date of issuance of the requested Warrant and Order.

Eastern District of Missouri

**ATTACHMENT A**

The United States has submitted an application pursuant to 18 U.S.C. §§ 2703(c)(1)(A) & B, (c)(2), and 3122 and Federal Rule of Criminal Procedure 41 requesting that the Court issue a Warrant and Order requiring a telecommunications service provider reflected in Part II of this Attachment A, to disclose the records and other information concerning the account described in Part I of this Attachment A.

**I. The Account(s)**

The Order applies to certain records and information associated with the following:

<b>Provider Name</b>	<b>Number or identifier</b>	<b>Owner, if known</b>	<b>Subject of investigation, if known</b>
<b>Sprint Corporation</b>	(314) 625-3288, (the subject cellular telephone)	<b>Unknown</b>	<b>MAURICE FULLER,</b> and others known and unknown

**II. The Provider**

Records and information associated with the subject cellular telephone that is within the possession, custody, or control of **Sprint Corporation**, and other applicable service providers reflected on the list contained in this Attachment A, including information about the location of the subject cellular telephone if it is subsequently assigned a different call number.

**LIST OF TELECOMMUNICATION SERVICE PROVIDERS**

<sup>2</sup> Last Update: 09/27/2019

## **ATTACHMENT B**

It is hereby ordered, pursuant to 18 U.S.C. §§ 2703(c)(1)(A) &(B), (c)(2) and 3123 and Federal Rule of Criminal Procedure 41, that the Provider(s) identified in Attachment A shall disclose to the United States the following:

### **I. PRECISION LOCATION INFORMATION**

#### **A. Information to be Disclosed by the Provider**

All information for the following time period of forty-five days from the date of this Warrant and Order, that is for the time period from *November 7, 2019 to December 21, 2019*, 11:59 p.m. (CT) during all times of day and night, regarding the location of the subject cellular telephone described in Attachment A.

“Information about the location of the subject cellular telephone” includes all available E-911 Phase II data, GPS data, latitude-longitude data, and other precision location information, as well as all data about which “cell towers” (*i.e.*, antenna towers covering specific geographic areas) and “sectors” (*i.e.*, faces of the towers) received a radio signal from the cellular telephone described in Attachment A.

To the extent that the information described in the previous paragraph (hereinafter, “Location Information”) is within the possession, custody, or control of the Provider, the Provider is required to disclose the Location Information to the investigative agency(ies).

#### **B. Information to Be Seized by the United States**

All information described above in Part I, Section A that constitutes evidence of violations of Title 21, United States Code, Section(s) 841(a)(1) and 846 involving **MAURICE FULLE**, and others known and unknown

## **II. CELL TOWER RECORDS AND OTHER TELECOMMUNICATION DATA**

For the subject cellular telephone identified in Attachment A, the following telecommunication records and information, but not the contents of any communication for the past thirty (30) days from the date of this Warrant and Order and at reasonable intervals for up to forty-five (45) days from the date of this Warrant and Order, the following:

### **Information to be Disclosed by the Provider**

1. All available names, addresses, and identifying information, and other subscriber and service feature information and types of service utilized;
2. Length of service;
3. All telephone numbers, Electronic Serial Number ("ESN"), a Mobile Electronic Identity Number ("MEIN"), a Mobile Identification Number ("MIN"), a Subscriber Identity Module ("SIM"), an International Mobile Subscriber Identifier ("IMSI"), a Mobile Subscriber Integrated Services Digital Network Number ("MSISDN"), or an International Mobile Station Equipment Identity ("IMEI") numbers, including any and all customer service records, credit and billing records, can-be-reached numbers (CBR), enhanced custom calling features, and primary long-distance carrier;
4. Subscriber information available for any originating telephone number;
5. Automated Messaging Accounting (AMA) records (a carrier billing mechanism data base search which provides records of originating and terminating caller information for calls to the subject cellular telephone) for the above-specified time period;
6. Means and source of payment for services, including any credit card or bank account number, and air-time summaries for available service periods, for the IP (internet protocol) addresses being utilized by and signaled to and from the aforementioned subject cellular telephone;

7. Cellular telephone records and information pertaining to the following, for the above-specified time period:

(a) call detail information (provided in an electronic format specified by the agents/officers of the investigative agency(ies), and other authorized federal/state/local law enforcement agencies);

(b) cell site activation information, including information identifying the antenna tower receiving transmissions from the subject cellular telephone number, and any information on what portion of that tower is receiving a transmission from the subject cellular telephone number, at the beginning and end of a particular telephone call made to or received by the subject cellular telephone number;

(c) numbers dialed;

(d) call duration;

(e) incoming numbers if identified;

(f) signaling information pertaining to that number;

(g) a listing of all control channels and their corresponding cell sites;

(h) an engineering map showing all cell site tower locations, sectors and orientations;

(i) subscriber information, including the names, addresses, credit and billing information, published and non-published for the telephone numbers being dialed from the subject cellular telephone;

(j) historical location estimates, such as Network Event Location System (NELOS), round-trip time (RTT), GPS, and per-call measurement data (PCMD); and,

(k) Internet Protocol (IP addresses) utilized by and signaled to and from the subject cellular telephone.

### **III. PEN REGISTERS AND TRAP AND TRACE DEVICES**

For the subject cellular telephone identified in Attachment A for a period of forty-five (45) days from the date of this Warrant and Order, the following:

1. Pursuant to Title 18, United States Code, Section 3123, pen register and trap and trace devices, including enhanced caller identification, may be installed by the investigative agency(ies) and used to record or decode dialing, routing, addressing, or signaling information, and to capture the incoming electronic or other impulses, which identify the originating number or other dialing, routing, addressing and signaling information reasonably likely to identify the source of a wire or electronic communication to and from the subject cellular telephone number, including the direct connect, Voice-over-LTE (VoLTE), non-content data transmissions, or digital dispatch dialings (if applicable), the dates and times of such dialings, and the length of time of the connections, pertaining to the subject cellular telephone described in Attachment A., including the date, time, and duration of the communication, and the following, without geographic limit, including:

- a. IP addresses associated with the cell phone device or devices used to send or receive electronic communications;
- b. Any unique identifiers associated with the cell phone device or devices used to make and receive calls with cell phone number described in Attachment A, or to send or receive other electronic communications, including the ESN, MEIN, IMSI, IMEI, SIM, MSISDN, or MIN;

- c. IP addresses of any websites or other servers to which the subject cellular telephone connected;
- d. Source and destination telephone numbers and email addresses;
- e. "Post-cut-through dialed digits," which are digits dialed after the initial call set up is completed, subject to the limitations of 18 U.S.C. § 3121(c).

2. The Provider, and/or any telecommunications service providers reflected in Attachment A, to include providers of any type of wire and/or electronic communications, and any other applicable service providers, shall initiate caller identification on the subject cellular telephone identified in Attachment A, without the knowledge of or notification to the subscriber, for the purpose of registering incoming telephone numbers

3. The Providers reflected in Attachment A, to include providers of any type of wire and/or electronic communications, and any other applicable service providers, shall furnish the agents/officers of the investigative agency(ies), and other authorized federal/state/local law enforcement agencies, forthwith all information, facilities, and technical assistance necessary to accomplish the installation and use of the pen register and trap and trace devices, including enhanced caller identification, unobtrusively and with minimum interference to the services that are accorded persons with respect to whom the installation and use is to take place.

4. The Providers reflected in Attachment A, to include providers of any type of wire and/or electronic communications, and any other applicable telecommunications service providers, shall provide the agents/officers of the investigative agency(ies), and other authorized federal/state/local law enforcement agencies, with the results of the pen register and trap and trace devices, including enhanced caller identification, at reasonable intervals for the duration of this Warrant and Order.

5. Should the subject cellular telephone identified in Attachment A and/or ESN, MIN, IMEI, MSID or IMSI number listed above be changed by the subscriber during the effective period of this Order, the request for pen register and trap and trace devices, including enhanced caller identification, shall remain in effect for any new telephone to which the subject cellular telephone listed above is changed throughout the effective period of these Warrants and Orders.

6. The Providers reflected in Attachment A, to include providers of any type of wire and/or electronic communications, and any other applicable service providers, shall be provided compensation by the lead investigative agency for reasonable expenses incurred in providing technical assistance.

7. Pursuant to Title 18, United States Code, Sections 3123(d)(1) and (2), the Provider, and the service providers reflected in Attachment A, to include providers of any type of wire and/or electronic communications, and any other applicable service providers, shall not disclose the existence of this application and/or any warrant or order issued upon this application, or the existence of the investigation, for a period of one year from the date of this Order to a subscriber or lessee or to any other person, except that the provider may disclose the warrant to an attorney for the provider for the purpose of receiving legal advice.

This Warrant and Order does not authorize interception of any communications as defined in Title 18, United States Code, Section 2510(4), but authorizes only the disclosure of signaling information, including cell site information, precision location information, including GPS information, related to the subject cellular telephone.

The investigative agency(ies), and other authorized federal/state/local law enforcement agencies, to whom this Warrant and Order is directed will begin monitoring the location of the

subject cellular telephone by one of the methods described in this Warrant within ten (10) days of the date of this Warrant and Order.
